

Zepoxy Accl P31 is a low viscosity acid-based hardener cum accelerator for amino resins. The resulting coatings are hard and resistant to scratches, solvents, and the effects of light.

APPLICATIONS

It can be used when combining amino resins with alkyd resins, saturated polyester resins, heat-curable acrylate resins, or epoxy resins in different surface coating applications like industrial metal finishing, furniture finishing and paper auxiliaries.

TECHNICAL DATA

Property	Test Method	Result
Appearance	Visual	Clear liquid
*Viscosity @ 25°C	ASTM D 3236-09	145 cPs
Recommended usage level	-	0.5-2% of amino resin

*Typical results under laboratory conditions

PACKAGING

Zepoxy Accl P31 is available as follows:

1 KG, 5KG, 15KG, 30KG, and 200KG

HEALTH AND SAFETY

Dispose containers of the materials as per local laws, rules, and regulations. Use gloves, safety masks and other safety apparel as per health and safety laws. For further assistance, please refer to the MSDS of the product for further health and safety information.
