

Zepoxy REH 416 is a low viscosity anhydride hardener with long pot life and low exotherm suitable for bulk mixing and working at high temperatures. It also has the added benefit of low freezing point, low volatility, and low toxicity. It is specially recommended to be used with electrical grade resins **Zepoxy RER 528**, **Zepoxy RER 527 EL** and in high voltage transformers and other electrical components such as motors, dry-type transformers, high voltage switches, line-output transformers, appliances capacitors, integrated circuits impregnation, casting and winding.

TECHNICAL DATA

Property	Test Method	Result
Appearance	visual	Clear, light yellow liquid
Color	ASTM D 1544-04	4 G max.
Viscosity @ 25°C	ASTM D 2196-05	30 – 50 cPs

*Typical results under laboratory conditions.

PACKAGING

Zepoxy REH 416 is available as follows:

1 KG, 5KG, 15KG, 30KG, and 200KG

HEALTH AND SAFETY

Dispose containers of the materials as per local laws, rules, and regulations. Use gloves, safety masks and other safety apparel as per health and safety laws. For further assistance, please refer to the MSDS of the product for further health and safety information.
